

DIGITAL EV CHARGING STATION

fuseEV is Meridian's innovative EV charging solution. The self-service charging station includes an interactive or non-interactive screen to display digital information.

The user-friendly solution offers accessible EV charge points to electric vehicle owners, while also providing ROI opportunities to the establishments investing in EV infrastructure. fuseEV is available as a stand-alone hardware solution, able to integrate with custom software, or available with Meridian's self-service software.

**“fuseEV is an EV charging solution that also provides ROI opportunities for companies and organizations looking to implement charging stations. It can be used as an informational tool, alert tool and advertising portal.”**

## Benefits and Capabilities

- The touch or non-touch screen allows users and passers by to engage with digital information.
